

Aesthetics without compromise

A Seminar on SimpliClear®

Brought to you by BioMers and the Association of Orthodontics (Singapore)

Patients world-over want a clear solution for their orthodontic problems. After years of development, BioMers is pleased to introduce SimpliClear®, the world's first completely clear, fixed labial brace system, that works without compromise on a full range of cases. The SimpliClear® system is personalised for each patient according to the treatment objectives of the orthodontist, delivering the control and predictability orthodontists' desire and the results and aesthetics patients seek. SimpliClear®, the latest innovation in advanced orthodontics, was made possible through a breakthrough in material science.

Key speakers, Dr. Vivien Tan, Senior Consultant at Tan Tock Seng Hospital, and Dr. Thomas Braun, a prominent speaker on cutting-edge aesthetic orthodontics from the United States; will share their experiences on the SimpliClear® system and how they have successfully integrated it into their practices.

Speakers

Dr Thomas Braun – DMD (USA)

Private Practitioner, Thomas Braun – DMD (USA)

Dr. Braun received his orthodontic certificate in 1983 from Tufts University School of Dental Medicine, in Boston, Massachusetts USA. He joined his father's practice in Connecticut where he continues the orthodontic practice. Dr. Braun has an interest in aesthetic orthodontic appliances including ceramic, lingual, removable, and functional appliances. He utilizes an intraoral laser scanner digital impression system, Cone Beam volumetric tomography, and other advanced digital technology in his practice. He speaks to orthodontic groups on cutting-edge aesthetic orthodontics. Dr. Braun resides in Fairfield, Connecticut with his wife Jae, and has three college age children.

Dr Vivien Tan - BDS, MDS (Oral Surgery) (Singapore), Cert. Orthodontics (Oregon, USA)

Senior Consultant, Tan Tock Seng Hospital, Singapore

Dr. Vivien Tan has been practicing orthodontics exclusively ever since completion of her specialty training from the Oregon Health Sciences University, USA in 1986. Her interest is mainly in adult orthodontics especially working with complex orthognathic surgery cases. This is largely due to her exposure in her earlier years while she was pursuing her training in Oral Surgery, as well as, her one year stint at the University of North Carolina, Chapel Hill under Dr. William Proffit. Currently, she holds the position of Senior Consultant and practices both at the Tan Tock Seng Hospital as well as the Khoo Teck Puat Hospital.

Dr. Renuga Gopal - PhD and M.Eng, NUS; (Singapore)

BioMers VP of Product Development and co-founder

Dr. Renuga Gopal is the principle inventor of the patented BioMers technology, which allows the development of micro-scaled polymer composites. She was awarded the Tan Kah Kee Young Inventors' Merit Award (Open Section) in 2003, for the 'Development of an Esthetic Orthodontic Archwire'. This award is awarded to inventors below the age of 35 for their innovations. She has published in the leading journals in the field of biomaterials on polymer composites and nanofibers. She also serves as a reviewer for several leading journals in the field of material science, membrane science and nanotechnology.

Programme

Time	Activity
1:30-1:45 pm	Registration
1:45-2:00 pm	Welcome address and introduction to BioMers By Dr. Renuga Gopal, VP of Product Development – BioMers
2:00-2:15 pm	Introduction to SimpliClear – A Clear Advancement in Orthodontics By Dr. Renuga Gopal, VP of Product Development – BioMers
2:15-3:00 pm	Being Successful with SimpliClear By Dr. Thomas Braun - Private Practitioner, Thomas Braun – DMD (USA) We desire to provide our patients with the highest level of care. As more adults seek treatment, there is a growing preference for less visible appliances. Orthodontists have always wanted an aesthetic orthodontic system that is effective, efficient and provides us with the control and flexibility that we desire. In this talk, Dr. Braun will discuss how SimpliClear meets these needs and how to successfully integrate and grow your practice with SimpliClear.
3:00-3:15 pm	Embarking on the SimpliClear journey By Dr. Vivien Tan - Senior Consultant, Tan Tock Seng Hospital, Singapore As orthodontists, the burden of proof in a new appliance system is in the clinical results. It took quite a while to overcome the inertia before I was willing to try yet another aesthetic wire. In a patient-driven market, we are constantly faced by our adult patients seeking a cosmetic approach to straighten their teeth that is affordable, comfortable with good predictable results accomplished in a reasonable time frame. Dr.Tan will share with you her experience embarking on the SimpliClear journey.
3:15-3:30 pm	Questions and Answers Session
3:30-3:45 pm	Coffee Break
3:45-5:00 pm	SimpliClear Certification Course By Dr. Renuga Gopal, VP of Product Development - BioMers Certification is only for doctors who want to sign up to be SimpliClear providers. Doctors can sign-up to be providers, on site, during the Coffee Break.

Venue

Saturday, 17th September, 2011 from 1.30pm to 5.00pm
The Grand Salon, Conrad Centennial, Singapore.

Please register in advance. Entry on a first come first serve basis.

Entry fee for AOS members \$20. Members can bring in one clinical staff to attend the seminar.

To register, complete and fax this form to **65-6515 8020** or email rachel@biomers.com Enquiries call **65-6570 5653**.
